EXPLORING CANADA'S NEIGHBOURHOODS

Neighbourhoods are at the heart of liveability. Unlike your home, neighbourhoods can't be changed by you alone. Looking at Canada's current home buyers, the 2020 RE/MAX Liveability Report examines their needs when it comes to liveability, and with the help of Local Logic, determines the top neighbourhoods in Canada suitable for their ideal liveability.

Nine-in-ten (91%)

Canadians have at least one important factor when it comes to the neighbourhood they live in now or would like to live in.

Eight-in-ten (82%)

Canadians say they'd sacrifice at least one desirable attribute in order to live in the neighbourhood they believe meets their liveability 'must-haves'.

Canada's top neighbourhoods were determined by analyzing the various lifestyles of Canada's current homebuyers and factoring in the liveability criteria that are likely to suit their neighbourhood 'must haves', as provided by the RE/MAX broker network. These factors were then scored using Local Logic's proprietary data technology.
